Nobody does it better than UTILITY REFRIGERATOR...

Compare quality, reliability and versatility and you will find there is NO EQUAL to UTILITY REFRIGERATOR. Whatever your requirements, UTILITY can offer a standard model or a custom product that more than meets your needs. At UTILITY, we do not just build products...we offer solutions.

INTEGRAL ONE-PIECE DOOR HANDLE

Stainless steel; ergonomically designed for easier door opening and closing

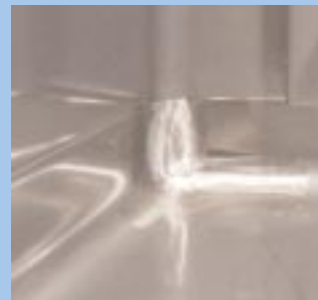

ONE PIECE STAINLESS STEEL GRILL

Easy to remove, easy to clean

WELDED AND POLISHED LINER CORNERS

Provide tighter seal and are more sanitary

CENTER LOCKING DOORS

Easy to reach locks increase security

CONCEALED LIGHT SWITCH

Located in door hinge to prevent breakage

HEAVY DUTY STAINLESS STEEL SHELF CLIPS AND STANDARDS

Allow shelves to support heavier weights. Corrosion resistant

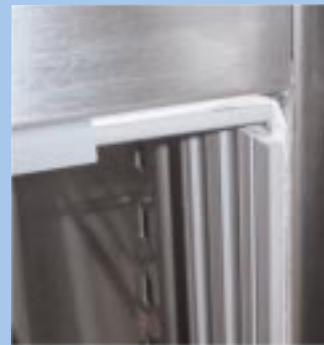

THREADED SHELF STANDARD INSERTS

Permit easy removal of interiors for cleaning without tools

BREAKER STRIPS

Require no fasteners; easy to replace heater wire

RECEIVER AND SERVICE VALVES

Enables system to adjust to varying loads and allows system pump down during service

Min. 2 1/2"

MINIMUM 2 1/2" HIGH DENSITY INSULATION THROUGHOUT

Exceeds industry standard; increases strength of box resulting in greater efficiency

SIGHT GLASS AND REMOVABLE FILTER DRIER

Standard on all models for quick and easy diagnosis without the need for expensive test instruments; protects and increases life of the refrigeration system

STANDARD ELECTRICAL COMPONENTS

Easy to replace and longer lasting

LOW HEIGHT REFRIGERATORS AND FREEZERS ALSO FEATURE:

- Reinforced sub-tops capable of supporting heavy restaurant equipment
- Specially insulated tops for efficient cooling when used with cooking equipment

LARGEST LEG AND CASTER STUD SIZE

Prevents buckling of leg supports; largest in industry

RUBBER GROMMETS

Used wherever tubing passes through sheet metal parts; prevent refrigeration line punctures, reducing chances for leaks

PLUS These Money Saving Standard Features:

- 4 shelves (industry standard, 3) per reach-in section
- Customer able to specify stub-out and drain line locations
- Condensing units feature service valves and access ports, eliminating the need to add taps or make other modifications when servicing
- Low pressure control prevents compressor burnout in the event of refrigerant loss
- Serviceable from front; saves time and money
- Easy to remove doors prevent damage during installation and make cleaning and servicing easier
- Easy to replace condensate heaters
- Adjustable, heavy duty edgemount hinges allow easy door adjustments
- Concealed all copper drain system reduces corrosion and leaks
- Safety testing exceeds UL standards. Everything tested at least twice
- Positive ground testing with dedicated liner ground
- Plastic bushings wherever electrical penetrates unit, reducing risk of electrical malfunctions

TELL US WHAT YOU NEED and UTILITY WILL BUILD IT FOR YOU

For over 70 years UTILITY REFRIGERATOR and the consultant and dealer communities have worked together to meet the needs of the end user. Whether it is a modification of one of our standard models or a "build-from-scratch" design, tell us what you need and UTILITY will build it for you.

PROUDLY MADE IN THE U.S.A.
